CAMERA VIEW :

3rd person camera for default situations and can switch to different angels and camera types for different situations .

GAME CONCEPT:

Bastion 23 is a third-person shooter game set in an old Algerian castle that has come under attack by Spanish forces. The player assumes the role of a skilled soldier defending the castle against waves of enemies. Each wave introduces new enemy types, and as the levels progress, the enemies become increasingly challenging to defeat.

GAMEPLAY OVERVIEW:

- The player starts inside Bastion 23, an ancient Algerian castle, which serves as the main hub for the game. The castle acts as a base of operations, where the player can upgrade their weapons, armor, and skills, as well as interact with NPCs for additional quests and information.
- The game consists of multiple levels, each comprising several waves of enemies. The goal is to survive and repel each wave, progressing to the next level.
- The player will have access to a variety of firearms, explosives, and melee weapons. Ammo and other resources can be found scattered throughout the castle or dropped by defeated enemies

Each wave will introduce a different enemy type, each with its own strengths, weaknesses, and behaviors. For example:

- Enemy Type 1: Basic Spanish Infantry :
These enemies are lightly armored and relatively easy to defeat.
- Enemy Type 2: Spanish Commandos : Highly trained soldiers equipped with advanced weaponry and tactics, posing a greater threat to the player.
- Enemy Type 3: Spanish Elite Guards :
Heavily armored enemies with superior firepower and increased resilience.

- As the player progresses through the levels, the waves become more challenging, with larger numbers of enemies and more advanced tactics.
- The player can earn experience points (XP) for defeating enemies and completing objectives. XP can be used to unlock and upgrade new weapons, abilities, and skills.
- The castle environment provides both strategic advantages and challenges. Players can utilize vantage points, traps, and fortifications to gain an edge in combat, while also defending against enemy siege tactic

ENEMY TYPES :

1-Basic Spanish Infantry

this type is from the first wave , they die with one hit and they are lightly armed therefore they are faster comparing to the other types

2-Spanish Commandos

this type comes in the second wave , they are stronger than the first wave , they die with two hit , they are slower comparing to the first wave ennimes

3-Spanish Elite Guards

this type
comes in the
last wave ,
they die with 3
hit , they are
the most
armored , they
walk very slow
